Environmental Policy

TEUNTIN is involved mainly in the repair of electric motors, industrial gearboxes and pumps which has minimal environmental impact. However, we are committed to reduce and eliminate possible negative influences within our means.

We:

- Are committed to comply with environmental laws and regulations.
- Use an electrically heated and temperature controlled burn-off oven.
- Burn the insulation of many motors at the same time.
- Advocate the repair of components or items rather than the replacement thereof in order to reduce waste and the environmental impact of producing, marketing and transporting new components and items.
- Collect all used oils in designated containers for proper disposal and recycling.
- Collect all respective metals in designated containers for proper disposal and recycling.

A handwritten signature in black ink, appearing to read "R Eggers", is written over a horizontal line.
